Lithium Force Group

Powering the Next Generation of Energy

Energy Storage • Solar • EV Charging • Project Development • Investment

Corporate & Investment Presentation

Last updated: September 2026

Who We Are

LFNE integrates energy technology, manufacturing partnerships, project development and investment capabilities to deliver renewable-energy infrastructure from concept to operation.

Energy Technology

Manufacturing Partnerships

Development • Investment Capabilities

Lithium Force Group

How the Platform Works

Four complementary capabilities work together across the infrastructure lifecycle — connecting energy technology and manufacturing partnerships with project development and investment capabilities.

Energy Technology

Manufacturing Partnerships

Project Development

Investment Capabilities

ONE INTEGRATED ENERGY ECOSYSTEM

LFNE connects renewable generation, energy storage and intelligent power delivery within one integrated energy ecosystem — supporting homes, businesses, EV charging infrastructure and the electricity grid.

Solar Generation

High-efficiency PV and flexible solar solutions convert renewable energy into usable power.

Storage & Grid Integration

Scalable BESS stores and dispatches energy across residential, C&I and utility applications.

Grid / Home / Business / EV

Energy is delivered where required across grid, building and mobility applications.

Integrated platform

Generation, storage and energy delivery connected within one infrastructure ecosystem.

Lithium Force Group

Energy Storage at Every Scale

One energy-storage platform. Multiple deployment scales.

Residential Storage

5 / 10 / 16 kWh modular battery systems supporting backup power, solar self-consumption and residential energy management.

C&I Storage

100–186 kW / 215–372 kWh systems supporting peak management, resilience and commercial energy optimisation.

Utility Scale BESS

2.5 MW / 5 MWh and 5 MW / 10 MWh containerized systems supporting grid services and large-scale renewable integration.

Core Technology

LFP battery architecture, thermal management, power conversion and grid-integration capabilities across multiple deployment scales.

Applications

- Renewable integration
- Peak management
- Energy arbitrage
- Backup power
- Microgrids

Lithium Force Group

Harnessing Solar Power Through Smarter Design

LFNE's solar portfolio supports conventional and specialised deployment environments, connecting photovoltaic generation with storage and intelligent energy management.

High-Efficiency PV Modules

Lightweight Flexible Solar

Solar + Storage Integration

Intelligent Energy Management

From Opportunity to Operational Asset

One coordinated process from project origination to operational infrastructure.

LFNE coordinates the project lifecycle from initial opportunity assessment through development, engineering, delivery and operation.

Opportunity Identification

Land, grid and preliminary feasibility assessment.

Development & Permitting

Regulatory approvals, environmental review and project structuring.

Engineering & Design

Technical design, equipment specification and procurement planning.

Delivery & Commissioning

Equipment integration, construction coordination, testing and commissioning.

Operation & Optimisation

Operational monitoring, performance management and long-term asset optimisation.

Lithium Force Group

Why the Model Matters

Integrated capabilities reduce handoffs and connect technology, project execution and capital requirements within one coordinated platform.

Technology Fit

Match energy technology with project and market requirements.

Supply-Chain Access

Connect project requirements with manufacturing and equipment capabilities.

Execution Continuity

Coordinate development, engineering and delivery through one project process.

Capital Alignment

Connect capital requirements with project milestones and deployment needs.

Lifecycle Integration

Maintain continuity from opportunity assessment through operational infrastructure.

MANBIZ / PRESENTATION SERVICES

Make your message matter.

Clear structure. Compelling visuals. Confident communication.

- Corporate & executive presentations
- Investor & strategic presentations
- Product & technical sales decks
- Partnership & project proposals
